

Senior . Net developer in Azure/Cloud environment

P19-033

Start datum: Asap
Locatie: Leuven
Duurtijd: Lange termijn

Function

- Development, release & support of applications built with .NET in an Azure/Cloud environment.
- Together with your teammates, you show us what Azure has to offer.
- You develop, test and document your code with care.
- You also see the bigger picture and help work out the planning and implementation.
- You are a web know-it-all and won't be held back from proposing functional improvements to existing websites and codes.

Profile

- You have thorough knowledge of .NET 4.5+, C#, Entity Framework, Unity and T-SQL.
- Very Strong experience in Basic .Net concepts such as Generics, Reflection, Interfaces/ abstract classes/ sealed classes. Inheritance, Virtual/ Override, Delegates, Events, Lambda expressions, Anonymous functions.
- Experience in multithreaded programming and Task based asynchrony.
- Experience with Azure (OAuth 2.0, Microservices, Azure Blob storage, Web API 2.0, Azure Service Bus).
- Knowledge of Build Automation, Nuget Package Management.
- The words 'software', 'architecture' and 'concept' don't scare you, on the contrary...
- You even plan the washing-up schedule at home with SCRUM meetings and meanwhile all your house mates and pets think Agile.
- You also get along with analogue people: you are enterprising, communicative, customer-oriented and result-oriented.
- You are bilingual in Dutch and English, both on chat and IRL.
