

Web Infrastructure Architect

P22 – 175

Start: 19/09/2022
Location: Brussels + remote
Duration: 12 months + possible extensions
Regime: Fulltime

Context

IT Middleware Web Hosting has the mission to provide infrastructure service in order to secure and host Web applications. The service provided by the team covers technical architecture, industrialization of web infrastructure & security assets, production support, integration of web applications and securing them.

Tasks

- Support projects with Web Hosting and Web Security architectural expertise and specific deliverables in order to define and apply the best architecture choices, which fit business purposes.
- Responsibility of DTD (Detailed Technical Design) documents for new projects – for the web infrastructure part
- Interact with the project architects, infra engineers and development squads in order to validate the DTD.
- Assist all participants in understanding of Architectural documents and DTD's.
- Contribution to promote orderly approaches in the delivery and in smaller requests: give guidance to all his counterparts.
- Contributes to the definition and maintenance of reference architectures.
- Bring an end-to-end view of the solutions and technical expertise when needed, in collaboration with other experts.
- Offer guidance for managing the landscape of deployed solutions.
- Detect savings opportunities and propose adequate and realistic actions.
- Detect decommissioning opportunities and propose adequate and realistic actions.
