

Angular Software Engineer / Coach P23-326

Start: Asap
Locatie: 2 dagen Halle of Zwijnaarde of Haasrode + 3 dagen remote/thuiswerk mogelijk
Duurtijd: 12 maanden (met reële kans op verlenging)
Regime: Voltijds

Description:

As a senior Frontend developer / Coach / Expert, you will act and perform as a master of the new technologies:

- You will help increase the maturity of the developers in the project(s) assigned to you
- You will coach your fellow developers to develop qualitative Frontend applications faster ☑ As a Frontend expert, you will share knowledge within the Colruyt organization by actively contributing to the Development Community platform and new

It is a full-time assignment:

- **About 60% of your work consists of coaching** other developers (in technical skills but also code quality awareness)
- **About 40% of you time**, you contribute **as expert** to building out Angular development on enterprise level

Tasks and responsibilities:

What will be your daily work?

In your role of **coach**

- Review low-level designs, code adhering to organization and industry standards (quality assurance)
- Coach developers in the organisation to improve their frontend skills
- Guide junior developers during their selfstudy/training in Angular
- Remain abreast with the upcoming technologies as needed. Ensures compliance of project deliverables are in line with Project Management methodologies.

In your role of **expert**

- Align with other Angular coaches on guidelines, standards, extra training needs ,...
- Coach the coach: support us in grooming potential future Angular coaches to expert/coach level.
- Manage Angular training path: keep in ligh with organisation's need and market standards
- Provide feedback to the organisation about the progress of development skills of our developers
- You will be involved in helping to give direction to our frontend development ecosystem of the future.
