

Solution Analyst e-Commerce food domain P23-332

Start: Asap
Location: 2 days Halle, 3 days remote
Duration: 1 year (with possibility to extend after positive evaluation)

Context

You will join our team of Solution Analysts working on the replatforming of our e-Commerce food ICT services. More specific you will be added to one of our Streams or Project that work in an agile framework to develop ICT services for Collect&Go. Your focus will be the continuous improvement and innovation of existing or new systems and processes.

Profile

We are looking for a professional or senior Solution Analyst to strengthen this team and be part in all process improvements of our e-Commerce Food services. We are also counting on your great coaching & communication (NL-EN) skills to take along some junior solution analyst colleagues.

Experience with working in an Agile/SCRUM environment and able to create user stories would be necessary.

In addition, you must have familiarity with ULM, BPMN or other modelling concepts.

Knowledge of SOA-Services is a big plus.

Goal

Think along with the business analysts, architects and developers about possible IT and process solutions of our e-Commerce food ICT services.

Expected output

- Implement process improvements with BP&S standard deliverables
- Convert the needs of the business into concrete solutions
- Perform functional tests on the built solutions
- Draw up clear work instructions for the use of a new or modified internal system.
- Analyse and describe the functional behaviour of systems and their interactions using UML or other standard modelling tools
